SAFETY DATA SHEET (SDS) INDEXING

ABOUT SDS INDEXING

All CHEMTREC® registrants are required to submit copies of, or immediate access to, all SDS (or product information) for products they ship, prior to any shipment taking place. Registrants are responsible for ensuring that all SDS and other reference materials for all products are up to date.

Due to the volume of submissions CHEMTREC® receives and processes on a daily basis, Registrants who submit large volumes of documents are required to provide an associated electronic index.

CHEMTREC® can help you complete this requirement by indexing large volumes of SDS on your behalf for an additional fee. This service includes indexing up to 6 fields: Product Trade Name, SDS Number, Product Synonyms, SDS Date, Product Code and SDS Language. Processing time to index the SDS documents can take up to 5 business days, from the time your SDS documents are received by CHEMTREC®.

ADVANTAGES

Why should you take advantage of SDS Indexing?

- Ensure that your SDS database is populated with accurate, detailed, index information
- Decrease human error during the indexing process
- Improve large volume SDS submission efficiency, process quality, consistency and information access
- Streamline the SDS document indexing process for CHEMTREC® submissions
- Save valuable time by having CHEMTREC® index your large SDS submissions

CUSTOM SERVICES

If you need to expedite an SDS submission, please contact Customer Service for additional information.
