

Dangerous Goods Spill at a Production Plant

Incident:

A plant worker in Japan called CHEMTREC through our interpreter to report a dangerous goods spill on their assembly line. The assembly line has been shut down temporarily until the spill can be cleaned-up. The worker needed product-specific information to properly clean the spill so that the assembly plant could be brought online.

CHEMTREC's Role:

CHEMTREC was able to locate the SDS and relay the emergency information to the caller through an interpreter. The caller realized that he needed additional information that was not located on the SDS. CHEMTREC contacted the manufacturer and was able to conference in the caller and interpreter to speak directly with the manufacturer to get additional information needed to help clean up the spill and re-start the assembly line
